Aspiring IT professional with hands-on experience in frontend and backend development. Proficient in delivering efficient and user-friendly technological solutions while leveraging modern frameworks and tools. Seeking opportunities to contribute to impactful projects.

PROJECTS AND EXPERIENCE

FindNest: Advanced Lost and Found Management System

Project Manager, Full Stack Developer

Cebu City, PH

January 2024

- Developed a digital solution to automate the lost and found process at CIT-University, improving efficiency for students, faculty, and staff.
- Implemented features such as item reporting, claim verification, search functionality, and history tracking for better item management.
- Integrated role-based access control for security and privacy, ensuring only authorized personnel have access to sensitive information.

Nexa-Ai: AI Chatbot with PDF Reading

Frontend Developer

Cebu City, PH

May 2024

- Built an AI-powered chatbot using **Azure OpenAI services**, enabling users to interact with PDF documents by asking questions.
- Developed the frontend using **Streamlit** to provide a simple, user-friendly interface for PDF uploads and chatbot interaction.

Online Library Management System

Backend Developer

Cebu City, PH

May 2023

- Designed and implemented an online library management system using **Bootstrap, MySQL, PHP, and HTML**.
- Developed features for book cataloging and borrower management, ensuring smooth operations for the library staff.

PetFit: Health and Fitness App for Pet Owners

Frontend Developer

Cebu City, PH

May 2023

- Designed a health and fitness app for pet owners using Android Studio, focusing on intuitive interfaces for wellness tracking.
- Contributed to UI/UX design using **Figma**, focusing on a clean, user-friendly layout for key app functionalities.
